

IKENNA UBAH

Senior DevOps & Cloud Platform Engineer (Azure & AWS)
Stafford, United Kingdom | +44 7482 140055
Email: ikennaubah2@yahoo.com | LinkedIn: <https://www.linkedin.com/in/ikenna2/>

PROFESSIONAL SUMMARY

Senior DevOps and Cloud Platform Engineer with over five years of experience designing, automating, and operating secure, scalable cloud platforms across Azure and AWS. Specialises in Infrastructure as Code, CI/CD pipelines, Kubernetes operations, cloud security, and observability.

Proven track record of delivering resilient platforms, reducing operational toil, modernising cloud environments, and improving delivery reliability for engineering teams. Brings deep technical ownership, strong architectural thinking, and a focus on operational excellence.

SKILLS MATRIX

Cloud Platforms	Azure (AKS, ACR, VMs, VNets, Monitor, Key Vault), AWS (EKS, EC2, VPC, CloudWatch, IAM, S3, Lambda, Amazon Bedrock)
Infrastructure as Code	Terraform, ARM, Bicep, reusable modules, CloudFront, GitOps
Automation & Scripting	Python, Bash, Ansible, serverless automation, PowerShell, workflow orchestration
CI/CD Pipelines	GitHub Actions, Jenkins, Azure DevOps, automated testing, deployment patterns (blue/green, canary, rolling)
Containers & Orchestration	Docker, Kubernetes (AKS/EKS), Helm, ingress, service mesh, cluster security, autoscaling
Observability & Monitoring	Prometheus, Grafana, Loki, Alertmanager, Azure Monitor, Application Insights, AWS CloudWatch
Security & Compliance	IAM/RBAC, secrets management, encryption, cloud governance, vulnerability scanning
Platform Engineering	Platform design, reusable components, deployment reliability, cost optimisation, MLOps
SRE Practices	SLO/SLI/SLA definition, incident response, RCA, performance engineering
Collaboration	Agile/Scrum, technical reviews, mentoring, documentation & architecture writing

PROFESSIONAL EXPERIENCE

DevOps Engineer - Capital One

Birmingham, United Kingdom | Apr 2023 - Present

- Designed and delivered scalable cloud platforms in Azure and AWS using Terraform, improving provisioning efficiency by 60%.
- Built and optimised CI/CD pipelines with GitHub Actions and Jenkins, reducing deployment failures by 40%.
- Developed scalable AI model serving APIs using FastAPI and deployed containerized workloads to Kubernetes clusters.
- Led technical architecture reviews across POD teams, ensuring secure, compliant cloud designs.
- Enhanced observability using Prometheus, Grafana, and cloud-native tooling, improving system health visibility.
- Implemented automated ML pipelines for training, evaluation, and deployment, improving model release cycles and reproducibility.
- Strengthened cloud security with IAM/RBAC redesigns, automated guardrails, and secrets-management improvements.
- Supported cloud migration and modernisation initiatives aligned with resilience and governance requirements.
- Built and productionized RAG architectures, integrating LLMs with vector databases to deliver context-aware AI solutions.
- Worked with cross-functional teams to stabilise environments and continuously improve delivery processes.

Cloud / Platform Engineer - Alcatel Submarine Networks

London, United Kingdom | Nov 2021 - Mar 2023

- Automated Azure infrastructure using Terraform and ARM templates, reducing manual configuration by 50%.
- Developed reusable IaC patterns for compute, networking, and storage across environments.
- Implemented cloud monitoring, cost optimisation, and operational dashboards.
- Strengthened cloud security through RBAC design, encryption standards, and governance policies.
- Provided engineering leadership across Azure, AWS, DevOps tooling, MLOps and cloud architecture.

PROFESSIONAL EXPERIENCE (CONT.)

Cloud / Platform Engineer - Alcatel Submarine Networks

London, United Kingdom | Nov 2021 - Mar 2023

- Supported development teams with reliable, scalable cloud environments.
- Produced cloud platform documentation covering architecture, automation, and operations.
- Fine-tuned open-source LLMs using LoRA/PEFT techniques, improving domain-specific performance and reducing inference costs.
- Collaborated with cross-functional teams to translate business requirements into AI-driven solutions, accelerating product innovation.

DevOps Engineer - United Nations (IOM)

London, United Kingdom | Feb 2020 - Nov 2021

- Built and maintained CI/CD pipelines with Jenkins, GitHub Actions, and Maven for secure application delivery.
- Automated server configuration using Ansible and Python, improving reliability and reducing deployment errors.
- Managed Kubernetes clusters supporting high-demand containerised workloads.
- Optimized GPU utilization and applied quantization techniques to reduce inference latency and infrastructure costs.
- Contributed to ML/AI deployment pipelines for internal analytics initiatives.
- Automated UNIX system patching, enhancing security posture and compliance.
- Leveraged serverless automation to streamline operational and data workflows.
- Supported Agile teams with secure, scalable development and production environments.

CERTIFICATIONS

- Microsoft Certified: DevOps Engineer Expert (AZ-400)
- Microsoft Certified: Azure Security Engineer Associate (AZ-500)
- Microsoft Certified: Azure Developer Associate (AZ-204)
- HashiCorp Certified: Terraform Associate (002)

EDUCATION

B.Eng. Chemical Engineering
Nnamdi Azikiwe University, Awka (2008 - 2013)
